To whom it may concern,

This letter is being sent in appreciation of Dave Diss of Colorado Rural Water Association, and for all of his tireless efforts in providing top notch education and training opportunities to all of our local wastewater operators.

As the water quality technician for the City of La Junta, part of my duty is to assist our operators (water & wastewater) with both certification and education. Dave has always been just a phone call away to me or any wastewater operator that has a question or needs guidance of any kind. He is easy to reach and prompt to return messages when not available, which is very appreciated by those that are in need.

On numerous occasions I have heard operators speak of his teaching style and their appreciation for his ability to communicate with them on their level and not above them; along these lines he is celebrated for being receptive to ANY question that anybody may have. He is also willing to go above and beyond in working with operators to ensure they each have the personally tailored education that they need in order to obtain the necessary training units to maintain certification levels.

It has been my pleasure to work with Dave Diss during my time as water quality technician for the City of La Junta, and look forward to continue to do so.

Respectfully,

Christopher Menges

Water Quality Technician

City of La Junta
